FT4 on sats experiment

Downlink = is the freq were we will tune at the start of the pass in the downlink, during the pass the freq will change, Just to make it easier to find each other
UTC = is the time of the beginning of the pass at our location in JO11.

On S**unday 22/08** Thierry ON2ACO) and Jef (OS8NT) will be available,
On **Friday 20/08** only Jef (ON8NT) will be available,

I took only **XW2F** because downlink from XW2A is in the repeatersegment. XW2B → XW2E seems to have some isues: only first couple of seconds received,,,

We will call CQ during the passes.

Friday 20/08 (ON8NT)		**Sunday 22/08** (ON2ACO + ON8NT)		
sat	**UTC**	**sat**	**UTC**	**Downlink**
RS-44	0824 1809 2003	RS-44	0717 0914 1857	435.667
CAS4A	1812 1951 2130	CAS4A	1750 1929 2109	145.865
CAS4B	1812 1951 2130	CAS4B	1631 1809 1948 2128 (maybe...)	145.930
XW2F	0810 1719	XW2F	0735 1820	145.995
