We already had new plans, shortly after our success story in the DRC (9Q500N) in 2010, Pointe-Noire in the Republic of Congo became our next appointment. It took us a lot of time to get the license for TN2T. We never imagined that we could reach the 50,000 QSO mark, especially on the higher bands which remained open at night and this helped us to reach this astonishing QSO number! We wish to thank Grace & Gérard from the Malonda lodge for their hospitality. We are also thankful to our sponsors and donors for their generous contribution. To all, stay tuned for our next adventure.
